LIVE TEST - 1

Mahir Shadid

01888504938 – mahir.shadid@gmail.com

TASK-1: The response shows 201 created perfectly. But shows 400 when a username is already exists.

TASK-2: Provided the username and password in the authentication's basic auth and got expected result. Before blog insertion the response was a blank array.

TASK-3: After insertion the response showed the blog details as expected:

```
[
    {
        "title": "AI er khela",
        "content": "AI er ML diye onek kichu kora jay",
        "created_at": "2024-09-20T17:08:34.181827Z",
        "creator": {
            "username": "mahirshadid"
        }
    }
]
```

TASK-4: Newman report has been generated. It shows 400 Bad Request (FAILED) in newman because of username duplication. Adding new user is always successful.
