Manual Testing Assessment – 1 - Q1

Name: Mahir Shadid

Phone: 01888504938

Q1: You have a shoe-selling e-commerce platform. Now, the client wants to implement a new feature "Search". During the client meeting, they mentioned they wanted to make the search dynamic, with any keywords, or specific text. Now you have a chance to get into more details on the feature. You can ask 10 questions to the client. List the questions according to priority.

The table below has the questions that can be asked from the client:

QUESTIONS	PRIORITY
1. What kind of data can be searched from the search bar?	HIGH
2. Should the search feature suggest or auto-complete a text that is being written partially?	-
3. Should the search feature fix a word mistakenly typed by looking into its product database?	-
4. Do you want the search feature to support multiple product search separated by comma?	-
5. Do you want the search feature to support multiple keys to handle a specific search?	-
6. Should the search feature handle the products that are unavailable by showing any text or sign?	-
7. Should the search feature have any filter?	-
8. Do you want the search feature to recommend related items while searching for an item?	-
9. Do you want the feature to become personalized according to the user's searched items?	-
10. Should the search feature temporarily save the searched item so that it can be seen in a dropdown box while searching afterwards?	LOW
